Farooq detained under PSA, his house declared a jail

Amid growing concerns over farooq’s detention under PSA and the government’s commemoration of the 50th anniversary of the formation of jammu and kashmir union territory, there were reports of the detained leader’s health deteriorating. Former Jammu and Kashmir chief minister M. Farooq Abdullah was recently moved to the hospital after he complained of chest pain.

The government had recently extended the period of detention of farooq under PSA for 12 days, but it has been extended for another 12 days.

The government has also faced criticism for the lack of transparency in the detention process and the lack of access to independent medical experts to assess the health of farooq.

Neighboring countries have expressed concern over the detention of farooq, with some calling for his release.

The government has defended its actions, citing national security concerns, but has been criticized for not providing more information about the reasons for farooq’s detention.

The situation remains tense, with several protests and demonstrations taking place in the region.
Petition challenging odd-even initiative filed before NGT

CPCB reports show scheme had no impact on ambient air quality in 2016: plea

The stand of the government to implement the odd-even policy, merely on a study by people of other countries, is not only simplistic but also derogates the reputation of the CPCB and the NCR, the petitioners had contended.

The petition filed by Advocate Gaurav Banerjee, however, challenged the correctness of the scheme, stating that reports from the Pollution Control Board (PCB) of Uttar Pradesh and Haryana, and the CPCB and Pollution Control Board of the NCR have unequivocally stated that the odd-even policy, even when implemented for 15 days, has not impacted on even numbered vehicles which are permitted on an alternate basis under the scheme.

The petitioners had said that the odd-even policy has had no impact on the air quality at the Capital.

In a previous judgment, the NGT had directed the Central Government to remove the odd-even policy from the Capital cities.

The NGT had authorized the Delhi Government to implement the odd-even policy, merely on a study by people of other countries, and was not to derogate the reputation of the CPCB and the NCR.

The plea filed by Advocate Gaurav Banerjee, however, challenged the correctness of the scheme, stating that reports from the Pollution Control Board (PCB) of Uttar Pradesh and Haryana, and the CPCB and Pollution Control Board of the NCR have unequivocally stated that the odd-even policy, even when implemented for 15 days, has not impacted on even numbered vehicles which are permitted on an alternate basis under the scheme.

Court extends Rutul Patil's custody

A case on Monday extended the Enforcement Directorate (ED's case against Rutul Patil for three more days in a financial case related to the Edelweiss-YDF fraud deal.

Special Judge Arjun Ram allowed the ED to remand Patil for 10 more days after it submitted that the investigation was yet to be completed as the seized properties from the hard drive were still being analyzed.

In response to a query about which buildings need to be demolished and which would be restored, the CPWD said: “All buildings would be evaluated to propose from design and architectural plans which will need to be demolished or restored.”

The CPWD had issued a request for proposal from design and architecture firms in September 2015 seeking plans for the redevelopment project.

Women jump in front of metro, dies

A 43-year-old woman who was nabbed for trying to extort money from a jeweller was reportedly found dead on Monday while being transported to the police station.

The woman had been arrested by the police after she lodged a complaint against a jeweller from Shakti Nagar in northeast Delhi.

The police said that the victim had committed suicide by jumping from a police vehicle.

On September 17, the Union government released a recent report on the state of the manufacturing sector in India.

The report highlighted that the manufacturing sector had been hit by various factors such as global slowdown, weak demand, and high tariffs.

Malaria cases higher than last year: report

Around 100 cases reported in last two weeks, say civic bodies

Malaria cases higher than last year: report

The number of malaria cases reported till September 16 this year was 914 compared with 724 cases recorded last year, as per data released by the Delhi municipal corporations.

The data reveal that 247 cases of malaria were reported this year till the second week of September. Nearly 100 cases were reported in the past two weeks.

During the same period in 2018, there were 225 cases; 483 in 2017; 286 in 2016; 35 in 2015; and 260 in 2014.

Main months

Additionally, a review of data since 2004 shows that a majority of cases of vector-borne diseases are reported in the months of September to November.

For instance, last year, out of 2,383 cases of vector-borne diseases recorded in Delhi, 83.5% (2,020 cases) were reported between September and December.

Dengue cases

The number of cases of dengue till September 16 this year stood at 171.

Out of these, up to 60 cases were reported in the last two weeks.

The lowest number of dengue cases in the same period was recorded in 2016 at 55. The highest number of dengue cases in the last few years was recorded in 2015 at 15,867.

Chikungunya cases

The number of cases of chikungunya is also starting to pick up with 60 cases reported so far this year. Out of these, around 30 were recorded in the last two weeks.

Meanwhile, domestic breeding checkers (DBC) of the three municipal corporations called off their strike after receiving assurances that contract workers would be made permanent after reviewing the vacant posts.

The DBCs are responsible for checking the prevalence of breeding conditions across the city.

So far, the civic bodies have reported that officials concerned have visited up to 110 jab houses.

The Delhi Municipal Corporation Standing Committee also passed a resolution recommending creation of additional posts, added benefits and a raise in salary for DBC workers.

Moving the motion, Leader of Opposition Arvind Kejriwal said that Chief Minister Arvind Kejriwal had been praising the drop in the number of dengue cases, a consequence of the work done by DBC workers, who would soon be paid fund

Kajriwal invites Venadhan to join anti-dengue campaign

Kajriwal invites Venadhan to join anti-dengue campaign

Chidambaran Arntel Kajriwal on Monday invited Union Health Minister Dr. Harsh Vardhan to participate in the government’s anti-dengue campaign and make it a “huge success”.

“I invite you and all others at the Center to participate in this campaign. Your participation will inspire many others,” Mr. Kajriwal wrote.

The government had directed its employees to check their homes at 10 a.m. every Sunday and their offices at 11 a.m. every Friday for stagnant water, he said. Mr. Kajriwal also urged the Minister to direct Central government employees to participate in the government’s 10 Jagat 10 Raja 40-Minute campaign.

Dalit man burnt alive in U.P.

A 20-year-old Dalit man was allegedly burnt alive over his relationship with a woman from another caste, a killing that his relatives said also led to his mother's death.

According to the police, the sus­pect­ed case of honour killing occurred at Bhadesa in Hardoi district on Saturday.

Mess was beaten up, kept hostage in a house and set afire, Superintendent of Police Alok Priyadarshi said.

Locals rushed to the spot on hear­ing his cries and took him to a local hospital. He was shifted to a Lucknow hospital but succumbed to inju­ries on the way on Sunday, Mr. Priya­darshi said.

Mother dies of shock

A relative said Mona’s mother died of shock after hearing the news. According to the SP, locals said Mona was in a relationship with a girl and had gone to meet her when the inci­dent took place.

The FIR has been filed against fi­ve locals.

An OBC activist of Police Alok Priyadarshi said.

High Court stays Yogi govt.’s move to shift 17 OBCs to SC list

It was an apparent bid to woo communities ahead of bypolls.

U.P. CM Yogi Adityanath had been criticized over the BJP-led Central government, with Social Justice and Empow­erment Minister Tha­veer Ahmad Safdar telling the Rajya Sabha on July 2 that the move was not in accordance with the Constitu­tion.

Mr. Goffin had said that if the U.P. government wanted to go ahead with its proposal, it should follow procedure and send a proposal to the Centre. RPF Chief Mohanwar had also slammed the move as “unconsti­tutional” and called it “poli­tically motivated”.

These castes will no longer get benefits of quota under the OBC category. They will be treated as general castes. It is clear that Yogi government has issued this order to deceive those castes,” Mr. Mohanwar had said.

There was an apparent bid to woo communities ahead of bypolls. The court’s decision came on the petition filed by social activist Gerhard Faisal.

A special CBI court on Mon­day sentenced two candi­dates to rigorous impris­onment for seven years over their involvement in the Vyapam case, related to the recruitment scam in Mad­hya Pradesh.

The Vyapam cases special judge in Bhopal sentenced Rakesh Patel and Tarun Usare — who had applied for the post of Police Assistant Sub-Inspector and Sub-Inspector (VLO) — to seven years’ rigorous impriso­nment, along with fines rang­ing from 15,000 to 75,000, a CBI official said in a statement.

Seven-year jail term for two in Vyapam case

Rakesh Patel, Tarun Usare also fined.

The case was earlier re­garded on the allegations of criminal conspiracy in the theft of and manipula­tion in OMR answer sheets in connection with the exam­ination from the post con­ducted by Vyapam — Yaye­n­gerry Pathak Manjul (Pro­fessional Examination Board) — on June 9, 2013.

Answer sheets missing

It was alleged that when the envelopes containing the OMR answer sheets were opened on June 15, 2013, in the computer section of Vyapam for scanning, the officials found that two answer sheets were missing from the respective envelopes.

It was further revealed that the OMR answer sheets were stolen by two junior employees in connivance with a security guard for manipulating them.

Electrical work is under way in the new power house of the Pune Metro. The project is scheduled to be completed by October 2020.

**GADKARI CALLS FOR GROWTH THROUGH EDUCATION, PROMOTING VISIONARY LEADERSHIP**

Union Minister for Road Transport and Highways, Shri Nitin Gadkari called for growth through education, and promoting visionary leadership.

"The Prime Minister, Shri Narendra Modi, said exactly the same thing, that we need to work on how we educate our youth, on how we value them," Gadkari said.

"We need to change our attitude of merely educating our youth," he said.

"We need to work on how we assess the progress of our youth in the existing educational system," he added.

"Our education system, which has been the backbone of the country, is no longer adequate," Gadkari said.

"We need to promote innovative leaders who can lead our country to greater heights," he added.

"We need to work on how we can improve our vocational education system," he said.

"We need to make our educational system more relevant to the needs of our country," he added.

"We need to work on how we can make our educational system more inclusive," he said.

"We need to work on how we can make our educational system more equitable," he added.

"We need to work on how we can make our educational system more accessible," he said.

"We need to work on how we can make our educational system more affordable," he added.

"We need to work on how we can make our educational system more efficient," he said.

"We need to work on how we can make our educational system more effective," he added.

"We need to work on how we can make our educational system more productive," he said.

"We need to work on how we can make our educational system more profitable," he added.

"We need to work on how we can make our educational system more sustainable," he said.

"We need to work on how we can make our educational system more resilient," he added.

"We need to work on how we can make our educational system more adaptable," he said.

"We need to work on how we can make our educational system more flexible," he added.

"We need to work on how we can make our educational system more versatile," he said.

"We need to work on how we can make our educational system more robust," he added.

"We need to work on how we can make our educational system more robust," he said.

Officials get NCW, NHRC notices over gang rape

Muzaffarpur victim files complaint against government

The National Commission for Women (NCW) and the National Human Rights Commission (NHRC) on Monday took cognizance of the gang rape of a girl in a Bihar town of West Champaran district and issued notices to government officials.

The rape survivor, an inmate of the Champaran shelter home, had been refrained from doing her studies and had also not been given any records of the sexual abuse of 14 girls in the shelter home which was reported in May 2016.

The Supreme Court is monitoring the case.

The survivor had filed a complaint with the Bihar state government that the gang rape of girls in her neighbourhoods in a recent SIT on the Bihar-Fulahmar near the village of Baba Singh had been done.

The survivor was later admitted to the government hospital for treatment and the police said that none of the accused have been arrested.

The survivor has been in hospital for more than a week and was discharged from hospital after three months.

The woman has been under medical treatment.

The NHRC had issued notices over gang rape of a girl in the home in the matter of the NCW.

The survivor was later admitted to the government hospital for treatment and the police said that none of the accused have been arrested.

The slow climb to the trillion economy peak

There has to be a focus on human capital formation and in addressing the real reasons for the economic slowdown

A book by Dr. Manish Sabharwal, former Chairman of National Institute of Design, and Chief Minister of the Indian state of Rajasthan, highlights the importance of focusing on human capital formation and the need for a focus on the real reasons behind the economic slowdown. Sabharwal argues that the current economic policies are not addressing the root causes of India's economic problems, and that there is a need for a more comprehensive approach to economic development that emphasizes the role of human capital.

The author also discusses the importance of addressing the challenges faced by young people in the country, including the need for improved education and training opportunities. Sabharwal urges policymakers to take a more holistic approach to economic development, one that recognizes the importance of both human and physical capital.

In conclusion, Sabharwal's book provides a valuable contribution to the ongoing debate about how to address India's economic challenges. It is a must-read for anyone interested in understanding the root causes of the country's economic problems and exploring solutions that focus on human capital formation and addressing the real reasons for the economic slowdown.

**Goa, J&K Govt. on KJK terror justify lockdown, says SC**

Goa, J&K: The Supreme Court on Tuesday said that the Jammu and Kashmir government had justified the lockdown on the grounds of fighting terrorism and preserving public order. The court had earlier directed the state governments to file affidavits on the grounds on which the lockdowns were imposed. The J&K government had submitted an affidavit stating that the lockdown was imposed to prevent the spread of terrorism in the state, the court said. The bench had also directed the state government to file an affidavit on the grounds on which the lockdown was imposed in Goa. The Goa government had submitted an affidavit stating that the lockdown was imposed to prevent the spread of COVID-19 in the state. The bench had also directed the state government to file an affidavit on the grounds on which the lockdown was imposed in Goa. NC chief confined to one room

Family court asked to leave the house, visitor legal permission

**Special Correspondent**

Former Home Minister Amit Shah on Monday attended the National Security Advisor’s 83rd birthday, showered with pujas.

The Home Minister was given a detailed presentation on the prevailing security situation in Jammu and Kashmir, particularly along the Line of Control. Mr. Shah visited the site where the attack took place and he wanted to meet with the families of the brave soldiers who sacrificed their lives in the recent attack.

The Home Minister also expressed his sympathy with the families of the soldiers and indicated that the Indian Army is ready to take all necessary measures to ensure the safety of the families.

**Special Correspondent**

Chief Minister Farooq Abdullah was released from house arrest on Monday and was moved to a cell in Tihar jail.

The Home Minister had earlier asked for the release of Mr. Abdullah, who has been under house arrest since August 5.

Mr. Abdullah was among several political leaders who have been detained under the Public Safety Act, which allows the government to detain individuals without trial for up to 12 months.

**Special Correspondent**

Former Finance Minister P. Chidambaram has been granted bail in the INX Media case. "I have not been slapped on the most sensitive leader and protector to detain them for a prolonged period. A person booked under the PSA can be held without trial for three months," the court observed.

Mr. Chidambaram's bail application was heard by the Supreme Court on Monday and the court allowed his release.

The court had earlier rejected Mr. Chidambaram's bail plea, saying that the charges against him were serious and that he posed a flight risk.

Mr. Chidambaram's lawyer, Mr. Talvin of Delhi, said the Supreme Court had taken note of his medical condition and had directed the government to ensure that he is provided with proper medical care.

Mr. Chidambaram, who was arrested in July, has been in jail since August 21.

**Colombo**

The Supreme Court on Monday directed that the National Investigation Agency should conduct a fresh probe into the INX Media case.

The court had earlier handed down a separate order on the same case, directing the agency to complete its investigation within six months.

The court had also granted bail to Mr. Chidambaram, who was arrested in July.

The court observed that the charges against him were serious and that he posed a flight risk.

Mr. Chidambaram's lawyer, Mr. Talvin of Delhi, said the Supreme Court had taken note of his medical condition and had directed the government to ensure that he is provided with proper medical care.

Mr. Chidambaram, who was arrested in July, has been in jail since August 21.

President Donald Trump has said that the U.S. locked and loaded after attacks on oil infrastructure in Iraq, which he said were caused by Iran.

U.S. locked and loaded after Saudi attacks

President Trump has hinted at a potential military response to the drone strikes on oil infrastructure.

Weapons came from Iran coalition

The weapons were said to strike two Saudi oil plants by the kingdom’s air force, the Saudi-led coalition fighting in Yemen said on Saturday.

The investigation is continuing and all indications are that weapons are being smuggled from Iran into Iraq,” coalition spokesman Mansour al-Mashihi said in a statement.

This strike didn’t come from Yemen, terrorism is the main threat in our region, the Indonesian military are present, said Mr. Malik added.

Turkey holds summit on Syria conflict

The leaders of Russia, Iran and Turkey have met in Istanbul to discuss the current situation in Syria, with the aim of finding a political solution.

No breakthrough in Johnson’s Brexit talks in ECs Juncker

Mr. Johnson said in a Davos speech on Monday that he believes the U.K. would be able to agree and approve a new withdrawal agreement by the end of October.

Fuel prices may rise by up to ₹5 a litre
Drone attack on Saudi Aramco’s facility to impact prices: refinery margins to come under pressure

TUESDAY, SEPTEMBER 17, 2019

Fuel prices may rise by up to ₹5 a litre as the possibility of an economic slowdown and India is facing a fiscal deficit—funds going into a scribble—resulting in a loss of 5% per litre. Jim is papering over the fact that CBRE, the country’s largest real estate consultancy, has predicted a reduction in completions and a fall in property prices.

The ministry of finance and the state government are likely to release a new policy soon to help revive the Indian real estate market. The ministry has already announced a series of measures to help the sector, including a reduction in central excise duties on certain items, a cut in corporate tax rates, and a reduction in the minimum alternate tax (MAT) rate.

The government has also been trying to attract foreign investment to the real estate sector, which has been hit hard by the slowdown. In June, the government announced a new policy to encourage foreign investment in the sector, which included a reduction in the MAT rate and a reduction in the corporate tax rate.

Disruption, down to the detail

Drones of the sea, robotic bartenders and exoskeleton technology—here are our highlights of futurism exhibited at the vibrant Taobao Maker Festival in Hangzhou, China.

Tech for thought

(Extracted from far left) Robinson’s shark bot, C-exoskeleton, Yohji Yamamoto robot puppy, Royole’s FlexiPai and Hangzhou’s Yobotics.

A dog’s journey

The robotic pet section by Yohji Yamamoto has adults turning into loving children, verzaching plastic ears and barking loudly.

The goodboy on display today has interactive eyes and ears, circled in red, yellow and green, and a black nose to scrunch in.

The dog is connected to a smartphone mobile app. It captures images through the camera and displays a house-shaped icon with the child’s name on it. If the camera sees a person, it forms a robotic scan number opening the door. It refuses to move and moves in its direction as well, cocking its head and wagging its tail when recognized.

The dog is being launched next year, and is targeted for one specifically children and senior citizens. “We hope to use the customizable option to open doors. Children can learn how to programme the robot’s function via some easy codes,” says the designer.

If you’re curious…

The Taobao Maker Festival this year kicked off on September 9 and will continue in Hangzhou for two weeks. It is being staged at two events: the Alibaba Museum, Hangzhou, and the West Lake.

You need to order what you want from a connected app, and it sends on a connected mechanical arm with two graspers to the site.

The robotic pup picks up a steel jar, which it lifts by its handle. Then it goes to a coffee dispenser to collect the coffee and, finally, to the closest children to receive and deliver it. The dog simply repeats the steps: it goes to search for the coffee, brings it back to the children, and repeats the process.

The dog can also perform some tasks such as cleaning the floor, opening doors, or pulling out an umbrella from the umbrella stand.

The Robosea company also displayed a robot shark, the BIKI, which is controlled via a connected app. The robot can move by imitating the three-joint tail fin movements instead of using a propeller. This increases its speed and reduces noise. Its shell is made out of sound-absorbing material for sound insulation. The driver swimming with the shark is accompanied by the BIKI robot, which is sold for “like an underwater drone for the sea. It can take pictures underwater, move 500 degrees, and avoid obstacles.”

The true Iron Man

Wanghao dropped out of university to start C-exoskeleton Technology company. By working on the design of the team members, clad in a brand new exoskeleton holding the robot shark, the crew explored the use of underwater robotics which can be customised for research purposes, like monitoring the water quality and ocean engineering. It could assist in a target and move towards it. It could be paired up with other devices such as a mechanical arm, for greater functionality.”

The robot shark’s movement is based on a backpack, it straps on the gloves attached by an elastic cord, and begins to have a better overall feel. “The back contains the energy source of the equipment, and it pulls the gloves towards itself, reducing human effort.”

But why exoskeletons, when machines can do the same work? “In China, manpower is cheap. So we have a lot of workers. An exoskeleton would be the middle-ground option to increase efficiency while keeping costs low,” he says. A self-proclaimed fan of Elon Musk, he adds that the exoskeleton was a small part in his dream to improve human efficiency.

The future is foldable

There is a lot of buzz about Samsung’s Galaxy Fold, set to be relaunched later this year. Meanwhile, Royole got there first last year with FlexiPai, the first foldable phone. Despite open development, there is a lot of buzz about Samsung’s foldable phone. However, Royole got the lion’s share of the pie.

The true Iron Man

The Robosea company also displayed a robot shark, the BIKI, which is controlled via a connected app. The robot can move by imitating the three-joint tail fin movements instead of using a propeller. This increases its speed and reduces noise. Its shell is made out of sound-absorbing material for sound insulation. An exoskeleton would be the middle-ground option to increase efficiency while keeping costs low,” he says. A self-proclaimed fan of Elon Musk, he adds that the exoskeleton was a small part in his dream to improve human efficiency.

The future is foldable

There is a lot of buzz about Samsung’s Galaxy Fold, set to be relaunched later this year. Meanwhile, Royole got there first last year with FlexiPai, the first foldable phone. Despite open development, there is a lot of buzz about Samsung’s foldable phone. However, Royole got the lion’s share of the pie.

The true Iron Man

The Robosea company also displayed a robot shark, the BIKI, which is controlled via a connected app. The robot can move by imitating the three-joint tail fin movements instead of using a propeller. This increases its speed and reduces noise. Its shell is made out of sound-absorbing material for sound insulation. The driver swimming with the shark is accompanied by the BIKI robot, which is sold for “like an underwater drone for the sea. It can take pictures underwater, move 500 degrees, and avoid obstacles.”

The true Iron Man

Wanghao dropped out of university to start C-exoskeleton Technology company. By working on the design of the team members, clad in a brand new exoskeleton holding the robot shark, the crew explored the use of underwater robotics which can be customised for research purposes, like monitoring the water quality and ocean engineering. It could assist in a target and move towards it. It could be paired up with other devices such as a mechanical arm, for greater functionality.”

The robot shark’s movement is based on a backpack, it straps on the gloves attached by an elastic cord, and begins to have a better overall feel. “The back contains the energy source of the equipment, and it pulls the gloves towards itself, reducing human effort.”

But why exoskeletons, when machines can do the same work? “In China, manpower is cheap. So we have a lot of workers. An exoskeleton would be the middle-ground option to increase efficiency while keeping costs low,” he says. A self-proclaimed fan of Elon Musk, he adds that the exoskeleton was a small part in his dream to improve human efficiency.
Rishabh Pant faces a serious reality check in white-ball cricket

The wicket-keeper batsman has not done enough to justify his team's faith in the think-tank's faith.

**BCCI accepts Karthik’s apology**

The Board of Control for Cricket in India (BCCI) on Monday accepted India wicket-keeper batsman Dinesh Karthik’s unconditional apology for sending a “promise” of a 50 runs match for the TNPL side to a social media account.

The BCCI has accepted Dinesh Karthik’s apology and the matter is now a closed chapter, an official said.

The Indian team in the Davis Cup at Ja-pan 3-2 in the team event quarterreturns (Championship Division) of the 24th ITTF Asian Cus championships on Monday.

Good day for Sharath
Sathiyan Kamal beat both his compatriots, to Mahesh Veth-iam 11-4, 11-3, 11-14, 12 and Harimoto 11-2, 11-9, 11-10. Harimoto (JPN) 11-2, 11-7, 11-6, 11-4. The Indian men had ear-lier defeated Thailand 3-0 to enter the Championship Division.

However, the Indian wo-men bowed out in the first round, losing to Thailand 3-0.

 Gurpreet falls in close bout

Indian star Gurpreet negatived the Russian world No. 1 Viktor Ahn after a hard-fought battle in the World Championships earlier in the World Championships. The 25-year-old Soffa won the last of her four European Championship golds in 2001. If Vinesh, who is ranked 39th in the world, can win the 58kg world title again, it will be a major achievement.

Eashash beats Negi

A low score cost India’s Dev-ryaman Singh Negi (41kg) dearly as he lost to Jordan’s Ziad Eashash in the second round to bow out of the World men’s boxing champi-

ship here on Monday. Negi was competing in his maiden World champions-

ship. He lost 4-0 to the 34th seed. The first round belonged to Eashash as he managed to pull away from Negi’s defenses with surety. Negi recovered in the second round with well-placed body blows and right hooks, but Eashash won a split decision in the third round to win the bout 5-3.
